

We'll Never Pass This Way Again

Kirsty MacColl

Darling
While the firelight is low
I'm disappearing
Like the last day of the snow
And really, it's better this way
We both know it's over
And we'll never pass this way again
Sunshine and the desert call to me
And you know moonshine
Makes you blind so you can't see at all
But whatever you feel
It may not be real
And baby we'll never pass this way again
I'm not the only love you'll ever know
Look to your stars above and wish it so
Let me go
Darling
If I stay too long you'll tire of me
'cause darling, that's the way we are designed to be
So, hard as it is to say
We had the night and we had our day
We'll never pass this way again
