

# Hey Big Star

Kishi Bashi

When we were very young  
We were separated  
From a story in the center of our heart  
Never to know how it ends

And when we met again  
In a digital dream  
We would seem to be connected with our lifeline  
Heavy with wits of a gravity

Hey Big Star, you shine too bright  
I'm in love with you, I'm your comet tonight  
Swept me away in your blinding sun  
We'll melt someday into each other

So every day is spent  
Every penny as a sentiment  
Heaven only knows what I meant to say  
It's better to be with another

Easy for you to say  
Would we be lovers in another life?  
If all the stars align, and the way we love life  
It's nothing short of a miracle

Hey Big Star, you shine too bright  
I'm in love with you, I'm your comet tonight  
Swept me away in your blinding sun  
We'll melt someday into each other

Hey Big Star, you shine too bright  
I'm in love with you, I'm your comet tonight  
Swept me away in your blinding sun  
We'll melt some day, we'll melt some day

Hey Big Star, you shine too bright  
I'm in love with you, I'm your comet tonight  
Swept me away in your blinding sun  
We'll melt some day into each other
