

## Drive That Fast

## Kitchens Of Distinction

You stand here in my place  
Feel the warmth upon your face  
Stand back and start to smile  
You now have time  
You now have will

I would never want to leave this country  
Where rules are fast and knowledge easy  
I would never want to take you with me  
Unless you're open  
And trust my hand

I would never wish this much on you  
When what you have might be enough  
I would never want to drive that fast  
Unless you're ready, willing, happy

Take me  
Away from these simple feelings  
I know  
There's places on the other sides of here

Take me  
Away from these simple feelings  
I know  
I'll take that car and drive there faster

I would never want to take you with me  
Until you're open and grab my hand  
I would never wish this much on you  
Until you like to live that fast

You stand here in my place  
Feel the warmth upon your face  
Stand back and start to smile  
You now have time  
You now have will

I would never want to do that to you  
To take you far and leave you stranded  
I have never gone quite far enough  
But you can get off whenever you like

Take me  
Away from these simple feelings  
I know  
There's places on the other sides of here

Take me  
Away from these simple feelings  
I know  
I'll take that car and drive there faster

I would never want to do that to you  
I would never want to drive that fast  
I would never want to do that to you  
I would never want to drive that fast
