

Like A Stranger

Kitten

I'm gonna find someone to love me
For who I am, a perfect star
So lay your head down and you'll feel me
An empty prayer shot to the heart
And remember when you hold me
I'm everything you that you want and more
And if you find someone to love you like I can
That's what dog's are for

To find you with no one there
I'll kiss you in the black light

Will they still love you when you kiss the flame
Take you to the border in the ocean rain
Turn into the fire but you know it hurts
I'll be your baby I'll say anything
Love you like a stranger

I kissed you in the movies
With a bitter heart and a cynic's eye
And yes Jesus walked on water
Died with grace and made you mine
So lay your head down and you'll feel me
An empty prayer, electric light
And if you find someone to love you
Remember me before it dies

To find you with no one there
I'll kiss you in the black light
You'll wipe away all my tears
We'll shiver in the midnight

Will they still love you when you kiss the flame
Take you to the border in the ocean rain
Turn into the fire but you know it hurts
Slip inside the wire when you know for sure
To be your baby I'll say anything
I'll say anything
Love me like a stranger

So you say a prayer for the dying sun
From the car to the corner
Your will be done
Here on earth and little Tokyo
From the first street bridge to the neon glow
It's a suicide
Claim to fame
Paid testimony and a brand new name
So you load the gun
Here we go again
You're the face in the mirror my favorite sin
But you want revenge from the Lord above
So the rain comes down heavy like my love
Heavy like my love

Will they still love you when you kiss the flame
Take you to the border in the ocean rain

Turn into the fire but you know it hurts
Slip inside the wire when you know for sure

Will they still love you when you kiss the flame
Take you to the border in the ocean rain
Turn into the fire but you know it hurts
Slip inside the wire when you know for sure
To be your baby I'll say anything
I'll say anything
Just love me like a stranger
