

I Want To Go With You

Kitty Wells

I want to go with you to that other world we knew
The one your love takes me to I want to go with you
I wish I were glass so you could see through
Then you'd know before you ask that I want to go with you
I want to go with you...

You take me away to a world I never knew
But what else can say I want to go with you
I want to go with you...
