Boomerang

I turn and start to shake you baby Still on my tippy toes You know I should have left you baby A long long time ago

I sat there on my doorstep baby Crying in the rain But oh the crazy dream I watched my tears run down the drain

She's a boomerang Keep comin' back to me She's a boomerang Keep comin' back to me

You know sometimes You're just so damned hard to please

If I give my heart away Would it break these chains If I cried a million tears Would it drown the flame

You know you set my soul on fire But there's nothing left to burn Nothing left to burn You're just a boomerang Throw it out - watch it turn turn

Boom, boom, boom, boomerang She's a boomerang Boom, boom, boom, boomerang She's a boomerang

Nothing will shock you baby Stop - Look around Well I was out with the boys last night They said your babies back in town
