

And after all the things I been through, I know I really need You

And after all the things I been through, every day I need You

Sometimes I sit back think now and I just reflect  
I'm looking back on how many times now my life's been blessed  
And even when there's times when my mind just starts to stress  
I know You love me and plus for me You always got the best  
I must confess that there's times that I lose faith  
But You pick me up You dust me off and You send me now upon my way  
I guess that have to be the reason why You called it grace  
Every day Lord teach me now just to seek Your face

And after all the things I been through, I know I really need You

And after all the things I been through, every day I need You

Lord I want to take a second now just a second  
And thank You for another day alive cause every days a blessing  
Thank You for the love You given and plus the people that love me  
I saw a child smile today I know You was thinking of me  
Help me to walk humbly and keep temptation far from me  
Let Your hands guide me let Your light shine down on me  
Lord I feel Your arms around me I'm so glad You found me  
I lift my hand to praise Your name as Your Spirit surrounds me

And after all the things I been through, I know I really need You

And after all the things I been through, every day I need You

I never felt so alive as I do right now  
My dark cloud is gone I see the sun breaking through right now  
I'm seeing You right now I'm feeling renewed right now  
And all I want to be doing is just loving only You right now  
I lay my head to rest as I begin to close my eyes  
Another day is finished I thank You for Your peace inside  
Now I lay me down to sleep I pray before I wake  
That all that I am would point to You now in all I do or say
