

## That's All

KMFDM

Read the vision map the system soon to look into the mind  
Rediscover one another from abnormal points in time  
Fascination wish a way in to depart before they find  
Get defamed in isolation two plus one negative devine

Feed the vicious escalation never felt such close connection  
Feel the fever-patch persuasion  
News-print news-peak nevermind  
Suffocation and delusion from what the angle see the truth in  
At an angle point of friction free-fall tip-off destiny

I've got a fistful of money  
I'm done with the twist  
There's plenty of ways  
No way to resist  
Every little thing  
is gonna be fine  
What I like  
Is gonna be mine  
I've got a fistful of money  
I'm high at risk  
There's plenty of ways  
I couldn't resist  
Six billion souls  
And one urge to live  
I've got a fistful of money  
And nothing to give  
Free the hostage situation  
Taken as a simulation

Never was a war more real taken for a dollar bill  
Currency add more corruption added population problem  
Feeding hunger starve the weak  
News-print news-peak nevermind

Hate in love desert in good favour  
Diversification of the current flavour  
Speak in tounge's like empathy's son  
See the soul disengaging the sicker they come

That's all...
