

Red Alert

Koffin Kats

I saw the darkest of days
Planet x is comin' down well comin' down
And they're sendin' out the message to everyone
The invasion has begun so it's time to say goodbye

No use in resisting it's the end
The end

So a red alert is sounding out
Well were movin' underground well underground
To all the fallout shelters we will survive
'til they've taken what they want and they leave this place behind

So prepare yourself for the madness has begun
It's here

And now the war is here to blow
Atomic blasts can't bring 'em down well bring 'em down
Aliens from outer space killing us all
Planet earth is now their home and the humans are all gone

No use in resisting the end is here
Is here

Red alert
Sounding out
