

Remember Me

Kongos

I can see you running from the setting sun
Hoping you might steal just one more day

Don't forget when the moon comes up
You're feeling cold all alone you can count on me

I know that you're afraid to meet me
You try to take the long way home
But rest your mind
You can't defeat me
So carry on

Way up high you're out again somewhere else
Days go by you're everywhere but here

Don't forget to remember me all the time
In the end you will be a man

I know that you're afraid to meet me
You try to take the long way home
But rest your mind
You can't defeat me
So carry on

Way up high...

I know that you're afraid...
