

## Facelift

Konkhra

It all went wrong from the start  
I tried hard but agony took me  
Spent my life building up  
As mischief is brewed from my heartblood  
Those precious drops, we need for survival  
In hours of greed, taken from us  
Lost our youth, toil for life's worth  
Lost our minds, searching for something

Come be my saviour  
Give my worth  
Please turn back time  
Facelift

Misadventure, life is a whore  
I fucked her once, but she fucked me twice  
And I know, yes I know  
There's no way, no way to get even

And I learned nothing this time around  
Spent all of my life in the past  
And I know, I will fall  
As ignorant as the day I was born  
Those precious drops need for survival  
In hours of greed, taken from us  
Lost our youth, toil for life's worth  
Lost our minds, searching for lost times

With my life on the line  
Taking all I could grasp  
Take down all that I could  
Wasting all of me
