Do You Love Me Still?

The Kooks

I have thought that you have come back lately To take my soul away from me
Cause when I see you
You rip my heart out
But all the same you're not to blame
Baby baby I love you still

But I need your heart beating next to my heart In love I am
I need your heart beating next to my heart
In love I am

Do you remember how I met you child I was down and I fell for you completely When I wanted your heart and You didn't want me now you did But now you did

I need your heart beating next to my heart In love I am
I need your heart dancing next to my heart In love I am

Baby do you love me still Cause I miss you I miss you Baby I miss you
