

## Said and Done

### Kottonmouth Kings

When you look out at the setting sun,  
Another day has gone  
Just remember how far you've come,  
When all is said and done

As time flies by, and you start to wonder why  
Where, who, what, when,  
Know we will come together in the end  
If you do your best to live life to the fullest,  
Just remember that you'll always be dodgin' bullets  
It's a crazy road out there, but you can't be scared  
To get behind the wheel and lead like a pioneer  
I say this to the people, because you are my friends  
Life's short, so like some bread and milk, soak it in  
You'll never find what you're lookin' for if you go blind  
Because your past moves forward, gotta skip rewind  
Make the most of what you got and you gon' get more  
Be positive, keep on knockin' on them doors  
Keep on breakin' down the walls,  
Keep on tearin' down the boundaries  
Release your inner peace  
and hear the sound of your heart beat

When you look out at the setting sun,  
And another day has gone  
Just remember how far you've come,  
When all is said and done  
Take the future, put the past away,  
'Cause tomorrow there's a brighter day  
It doesn't matter where you're from,  
When all is said and done

I know my evil ways have brought the rain  
Have caused ya pain  
When all is said and done  
I know my evil ways have brought the rain  
Have caused ya pain  
When all is said and done

So when it's all over I say goodbye,  
To all of my girls and all of my guys  
All of my fans I say it with pride,  
Thank you for makin' the time of my life  
My partners in crime we write all the rhymes,  
My boys, fellas, the [?], the wife  
The good, the bad, the life we bathe,  
The ups, the downs, I wanna say thanks  
Put a smile on ya face, We all got paid  
Kottonmouth Kings, ya'll know we'll never fade  
Just like Tupac, God I pray,  
Know I said that song today  
All the memories I have with the boys on the set  
All the time that we spent makin' money, reppin' shit  
Man, life don't get no better than this

When you look out at the setting sun,  
And another day has gone

Just remember how far you've come,  
When all is said and done  
Take the future, put the past away,  
'Cause tomorrow there's a brighter day  
It doesn't matter where you're from,  
When all is said and done

I know my evil ways have brought the rain,  
Have caused ya pain  
When all is said and done  
I know my evil ways have brought the rain,  
Have caused ya pain  
When all is said and done

What's up with all these bad times I'm seein' nowadays  
I'm seein' all these good people ditch they good ways  
The corner blocks stay full of struggle lookin' hard knocks  
A vocal point reflectin' on the disconnected dots  
Within the vision I can see a brighter, better road  
A pavement newer, stronger, handlin' this larger load  
A sign of life, a sign of livin', choice of how it goes  
Stayin' in the moment,  
Will I wake? Nobody knows

When it's done, when we packed up and loaded out  
The world is over and we splittin' into different routes  
Headin' different ways,  
Hittin' on some super haze  
Tellin' war stories,  
Reminisclin' bout the glory days  
I'm still amazed that our letters still unfold  
The legacy of a kingdom with it's super bowls  
Us against the world, Underdog misfits  
Don't underestimate the power of our bong hit, biotch

When you look out at the setting sun,  
And another day has gone  
Just remember how far you've come,  
When all is said and done  
Take the future, put the past away,  
'Cause tomorrow there's a brighter day  
It doesn't matter where you're from,  
When all is said and done

I know my evil ways have brought the rain,  
Have caused ya pain  
When all is said and done  
I know my evil ways have brought the rain,  
Have caused ya pain  
When all is said and done

Life is a journey, my friends  
So enjoy it while you're here  
Tomorrow's never guaranteed  
Be the peace, feel the love
