Killing My Wrath

I leave from town Where is the black heaven Forever here Remain darkness With the strain of look for My oneself again And my body Killing my wrath

Killing my wrath Killing my wrath

Wounds hurt again, who time don't heal I look for better, what remain on us Who betray own self, betray again And my body killing my wrath

I hide the tracks Is the time go away From the dark grave I dig the conscience Then to my torment I remember again And my body Killing my wrath

Killing my wrath Killing my wrath Krabathor
