

## As the World Burns

Kreator

The war is here  
The future stops  
Existence ends  
Apocalypse will take our lives  
One by one  
As cities fall  
As cultures die  
As hope for survival  
Turns into nothingness for us

Await your fate  
You know there is nothing to save us now  
Mankind never learns  
Controlled by violent brains  
The population has to pay  
Doomsday has returned  
As the world burns

Try to run, try to scream  
It's too late  
Megatons of death await to explode  
To clear away  
Fire and Pain  
Now the time has come to destroy the planet Earth

Await your fate  
You know there is nothing to save us now  
Mankind never learns  
Controlled by violent brains  
The population has to pay  
Doomsday has returned  
As the world burns

Await your fate  
You know there is nothing to save us now  
Mankind never learns  
Controlled by violent brains  
The population has to pay  
Doomsday has returned  
As the world burns
