

# One of Us

Kreator

See the sun for the last time  
Remember - make your will before you come to this place  
Choose your weapons and I'll take mine  
Me or you, no-one knows, we stare into death's face

Hit him right between the eyes  
Only one of us will leave this place alive  
One of us!  
One of us!

Beg for mercy and I'll spit at you  
Say goodbye to everything and everyone you loved  
A violent death is what you have to face  
I'm here to terminate, your soul will rise above

Hit him right between the eyes  
Only one of us will leave this place alone  
One of us!  
One of us!

Now take ten steps and turn  
Today there's no return  
You've got only one try  
Today one of us will die  
Sweat is running down your neck  
As you wait for my attack  
Your final minute draws near  
You won't feel pain as you die

Hit him right between the eyes  
Only one of us will leave this place alone  
One of us  
One of us

I'm the one who leaves this place alive
