

# We Are One

Krewella

I wanna go for a ride  
Until the morning comes  
Show me the meaning tonight  
Of what we could become  
I can't go any longer  
Feels like I've been underwater  
You are the one and I need the rush takin' over me  
I crave you more than ever

We are one like the sky is to the stars  
We are one take my breath and I am yours  
We are one as you open up my heart  
Running out of air

You are taking me there

There's no denying the power  
'Cause something pulls us together  
You are the one and I need the rush  
Every part of me is free when I surrender

We are one like the sky is to the stars  
We are one take my breath and I am yours  
We are one as you open up my heart  
Running out of air

You are taking me there  
You are taking me there  
You are taking me there  
You are taking me there

You are taking me there

We are one like the sky is to the stars  
We are one take my breath and I am yours  
We are one as you open up my heart  
Running out of air

You are taking me there  
You are taking me there  
You are taking me there  
You are taking me there
