

# Lifetime

Kris Allen

I wake up, put my poker face on  
It's roughly the same hand  
I was dealt yesterday  
I stand up and stare out at the skyline  
It's roughly the same town  
That I saw yesterday

Living doesn't come first try  
It takes a lifetime getting it right  
It takes a lifetime to learn how to sing  
To find my place in the worlds symphony  
To become the man today  
The man I thought I could be

It takes a lifetime  
It takes a lifetime

I wake up and bandage these scars  
The scars of my heart  
That prove that I'm still alive  
That I'm still alive  
Living doesn't come first try  
It takes a lifetime getting it right

Living doesn't come first try  
It takes a lifetime getting it right  
It takes a lifetime to learn how to sing  
To find my place in the worlds symphony  
To become the man today  
The man I thought I could be  
The man I thought I could be

It takes a lifetime  
It takes a lifetime
