

Forever in Your Love

Kris Kristofferson

Lovers make believe in dreams
Dreamers make believe in makin' love to last forever
Losers can't believe in anything at all
Hey-we never meant to fall so hard
But don't be sorry

Think of all the love we made us
Since you used to be afraid of
Staring at those starry skies above our lives
And now you're free to
Be the best that you can be now
From here to eternity and I'll be here
Forever in your love

Nothing ever stays the same
Sometimes lovers even learn to change
And turn to strangers
If we never see a single dream come true
Hey, I still believe in you and me and I'm not sorry.

Think of all the love we made us
Since you used to be afraid of
Staring at those starry skies above our lives
And now you're free to
Be the best that you can be now
From here to eternity and I'll be here
Forever in your love

Be the best that you can be now
From here to eternity and I'll be here
Forever in your love.
