## Streamer

See the evening lights Day has gone, the stars begin to shine Shadows move so slow Holding for the forest further on Darkness and disgrace Silver moonlight's falling on your face But love you're not alone Turn on with me and try to keep this song I'm a streamer in the night You're just out of sight But need of spirit's crying in the night Near the railway line A fallen angel's waiting for a sign I'm a streamer in the night **Krokus**
