

## We'll Rise

Krokus

Dark was the night, tears on my face  
We gathered in the candlelight as the whole world stood still  
How can I forget that prayer for the dead  
Underneath that blackened sky  
As close as we could get  
It's the age we're livin' in  
A dark sign of the times  
Can't let the madness kick us down to the ground  
We'll rise, we'll rise  
We'll shine in the night  
We'll rise, we'll shine from the ashes of eternity  
We'll rise, we'll rise  
We'll shine in the night  
We'll rise, we'll shine to eternity  
Another starry sky, another silver moon  
And soon the sun will shine warming our roofs  
Gather your children  
We must move with the wind  
to make a fire bright from the flames within  
We'll rise, we'll rise  
Like an eagle flies in the sky  
'Cos together we're strong  
And we'll rise, we'll rise
