Angel On My Shoulder

Krystal Harris

So many nights alone Without you by my side I never knew what I was missing But then you came along With all your special ways Bringing me joy, laughter, What I was wishing for [CHORUS:] My angel On my shoulder You give me shelter You give me love and affection Everytime I turn around You're still right here Angel My angel Ooh my dear My wonderful friend In times we'll triple the land When all the rest of The world runs away You open up my heart And make me realise You would be the one Who would stay [Repeat chorus] When things sometimes Start looking out You're with me No matter what No matter how You seem to find a way Sharing your love From up above You're all I'll ever need God must have Sent you to me Ooh ooh My angel On my shoulder You give me shelter You give me love and affection Everytime I turn around You're still right here My angel My angel Ooh my dear Ooh my dear Ooh my dear Ooh my dear
