

On My Star

Kt Tunstall

If it happened
And our feet fell away
From familiarity and found their way out there
If we could choose how it went down that day
We could hand-pick a heaven
Right here
I wouldn't need a suitcase
Just palms outstretched and fingers spread and I
Wouldn't loot the Palace
Just take what's in my heart and head
And you, you, you, you, you

I want you honey
And I need you where you are
I want you on my star
And we won't need money
Where we're going it's too far
I want you on my star

So say it happened
And we bid farewell to our home
And watched the coastline retreat like a memory
In any doubt
I would take hold of your hand
And together we'd dream of our
Future plans
Look into the darkness
All full of stars and endlessness
And cast a spell upon it
For that's the way we make it ours
It's true, true, true

Oh I want you honey
And I need you where you are
I want you on my star
And we won't need money
Where we're going it's too far
I want you on my star

Oh I want you honey
And I need you where you are
I want you on my star
And we won't need money
Where we're going it's too far
I want you on my star

On my star
