

# Why Did You

Kumbia Kings

Why did you break my heart  
And say your goodbye  
Why did you break my heart  
And leave me with tears in my eyes  
How could you say you left me  
When all your words were true  
Let me say you really fooled me  
My heart just didn't see it coming

I still can see the pictures on the wall  
Of you and I when I walk through the hall  
How can I forget the happy times  
When I thought we were both in love  
I still can hear your voice  
When you would say to me you would never leave me  
How I believed you  
My eyes were just too blind to see

Oh I surrendered my heart  
But you just tore it apart  
How could you leave me so lonely, lonely  
I gave my heart to you  
How could you just leave me crying

Why did you break my hear  
And say your goodbye  
Why did you break my heart  
And leave me with tears in my eyes  
How could you say you left me  
When all your words were true  
Let me say you really fooled me  
My heart just didn't see it coming

Tell me baby  
Why did you have to leave  
Just tell me baby  
I'm begging you, begging you please

How could you leave  
Without a word to say to me baby  
And how could you think  
That all my life without you here would be the same  
When you went away  
I can't believe the emptiness just hit me baby  
My heart was crying so loud  
I just could not believe it  
Oh I surrendered my heart  
But you just tore it apart  
How could you leave me so lonely, lonely  
I gave my heart to you  
How could you just leave me crying

Why did you break my hear  
And say your goodbye  
Why did you break my heart  
And leave me with tears in my eyes  
How could you say you left me

When all your words were true  
Let me say you really fooled me  
My heart just didn't see it coming

Why did you break my hear  
And say your goodbye  
Why did you break my heart  
And leave me with tears in my eyes  
How could you say you left me  
When all your words were true  
Let me say you really fooled me  
My heart just didn't see it coming

Ohhh  
Ohhh  
Whooooo  
Ohhh  
Hooooooo
