

Four Seasons

Kurt Nilsen

Flowers fade as the fall comes back
another year is gone
It's gettin' colder now
Leaves on the trees are falling down
well I, I'm still in love

Clear blue sky far as the eye can see
The morning you awake
it's been snowing in the streets
The birds flew south
as the winter came to me
Well I'm, I'm still in love

Well I miss you so much
I miss you
your laughter, your smile, your big green eyes
I miss you so much
will the years change the love?
I'm still in love

Sun appears and warm will come
The grass is all greener now springtime's come
remember the time
when you came along
And I
I fell in love

Summer's here and the lazy days
I'm driving in my car
just to catch your rays
The only thing is missing
is your beautiful face
Well I, I'm still in love

Well I miss you so much
I miss you
your laughter, your smile, your big green eyes
I miss you so much
will the years change the love? I'm still in love

Sun appears and warm will come
The gress is all green and springtime is come
Remember the time when you're came along
and I I fell...

I miss you so much
I miss you
your laughter, your smile, your big green eyes
I miss you so much
will years change the love
I'm still in love
