

The Other Man

Kyle Park

Here I come baby Right on time
You're one and only for one long night
What do you say we skip conversation

Now I'm a lover and I know what you need
Just tell me when and you'll begin to see
What I can do for your sweet temptations
Darling you're dying with anticipation

I know it thrills and kills you to know this is only a play
But you keep coming back for the same thing
I'll never be the one who knows you inside out
I'm just the other man your man knows nothing about

Move a little closer don't be shy
I can see it inside of your eyes
All you want is pure satisfaction
Tell me that you love me say what you want
You can claim you need me but you know you don't
Call me just another minor distraction
Nothing more than a fatal attraction

I know it thrills and kills you to know this is only a play
But you keep coming back for the same thing
I'll never be the one who knows you inside out
I'm just the other man your man knows nothing about

Here I come baby I'm all that you need
Just tell me when and you'll; begin to see
How I can meet all your expectations
Darling' no need for any explanations

I know it thrills and kills you to know this is only a play
But you keep coming back for the same thing
I'll never be the one who knows you inside out
I'm just the other man your man knows nothing about
Oh I'm the other man your man knows nothing about
