Alchemy

Kyler England

[Verse 1]
October turned the leaves to copper & gold
Set my world on fire left me in the cold
If I were a master of alchemy

[Pre-Chorus]
I'd change everything
I'd make all the broken things beautiful
Especially the way we left it

[Chorus]
If only we could go back
Maybe we could change it
Fix a single mistake
Maybe that would save it
Turn this ship around
It's headed for the falls
But it's all been said and done
Said and done

[Verse 2]
Take a telescope and focus on the stars
A million light years and fading
That's how far you are
If I had invented a time machine

[Pre-Chorus]
I'd change everything
I'd make all the broken things beautiful
Especially the way we left it

[Chorus]
If only we could go back
Maybe we could change it
Fix a single mistake
Maybe that would save it
Turn this ship around
It's headed for the falls
But it's all been said and done
Said and done (3X)

[Bridge]
There's a time for one last hope
And there's a time for letting go

[Chorus]
If only we could go back
Baby we could change it
Fix a single mistake
Maybe that would save it
Turn this ship around
It's headed for the falls
But it's all been said and done

[Chorus 2]
I know we can't go back
Baby we can't change it

Every single mistake
They were all worth making
I'd do it all again
For the high before the fall
When it's all
Said and done (4X)

Every single mistake
They were all worth making
I'd do it all again
For the high before the fall
When it's all
Said and done (4X)
