

# When The World Stops Spinning

Kyler England

There's a charcoal sky tonight  
See the hills on fire for miles  
The air is hard to breathe  
Home is hard to leave  
Even now, even now

I will let you go  
When the world stops spinning  
I will let you go  
When the world stops spinning  
I will let you go  
When the sun and the stars explode  
And the world stops spinning

When the terra firma quakes  
When the oceans tidal wave  
I would rather die  
Than to ever say goodbye  
To you my love, to you my love

I will let you go  
When the world stops spinning  
I will let you go  
When the world stops spinning  
I will let you go  
When the sun and the stars explode  
And the world stops spinning

I don't need a savior  
I don't need a saint  
When the moment comes  
I'll be calling out your name  
How i long to be with you till the end

I will let you go  
When the world stops spinning  
I will let you go  
When the world stops spinning  
I will let you go  
When the sun and the stars explode  
And the world stops spinning

There's a charcoal sky tonight  
See the hills on fire for miles
