

Wait

Kylie Minogue

Under the sky, not a good night
Safe in the dark clashin' the light
All to the life all realized, oh
All that we bring, what do we live?

Burn heart and bright
Higher and higher you go
Don't go away
And if we let go don't you let go
We, we tremble, so be gentle
While we wait so we stay
Every time we look, girl
Baby, don't you let go
We still tremble, burn like a limber
What we've been here instead
We wait (we're waitin'), we wait (we're waitin')
We wait (we're waitin'), we wait (we're waitin')
We wait

I don't know why stars shine bright
How good and wrong never be right
Clowns may cry as they talk in the nights
Oh, all that lies with the tears we cried

Burn heart and bright
Higher and higher you go
Don't go away

And if we let go don't you let go
We, we tremble, so be gentle
While we wait so we stay

Every time we look, girl
Baby, don't you let go
We still tremble, burn like a limber
What we've been here instead

We wait (we're waitin'), we wait (we're waitin')
We wait (we're waitin'), we wait (we're waitin')
We wait

Burn burn burn burn burn
No no no no no
There's a mist with all these stars
Like silhouettes in smoke

We're waitin', we're waitin', we're waitin'
We're waitin', we're waitin', we're waitin'
