Where Is the Feeling?

Kylie Minogue

There's nobody better, better than you You make me feel happy Happy, happy to know you

But where is the feeling? The feeling of security When we're not together Tell me everythings gonna be alright It's just no use, can't get over you

Anytime you want me to I can make you happy (I can make you happy) There ain't nothing I wouldn't do (anytime) To make you happy

Anytime you want me to I can make you happy (I can make you happy) There ain't nothing I wouldn't do (anytime) To make you happy

Tell me Im crazy Maybe since you've been gone They don't understand that together Together we're one

But where is the feeling? The feeling of security When we're not together Tell me everythings gonna be alright It's just no use, can't get over you

Anytime you want me to I can make you happy (I can make you happy) There ain't nothing I wouldn't do (anytime) To make you happy

Anytime you want me to I can make you happy (I can make you happy) There ain't nothing I wouldn't do (anytime) To make you happy

When we're not together Tell me everything's gonna be alright When we're not together Tell me everything's gonna be alright When we're not together Tell me everything's gonna be alright When we're not together Tell me everything's gonna be alright When we're not together Tell me everything's gonna be alright When we're not together Tell me everything's gonna be alright When we're not together Tell me everything's gonna be alright
