

# White December

Kylie Minogue

The black is by the fire  
The lights are on the tree  
Elvis sings Blue Christmas for you and me  
Everything is perfect  
The candles have it glow  
The only thing what's missing is that sub zero

Those things that we should do  
Just people we should see  
Don't wanna move an inch  
Don't need no company  
Just wanna be beside you  
Just like it was last year  
When all the lights were frozen  
Could we move from here?

It's got me praying for snow  
To start falling

Baby, baby, do you remember  
That crazy Christmas with the crazy weather  
And spend a weekend and closer and closer  
I wanna do it one time over

Baby all we need is snow from somewhere  
To lock the door so we can go nowhere  
Getting back to you and me together  
Now every year I'm wishing for the white December

We cuddled on the couch  
We drank a lot of wine  
Sang along to Fairytale of New York until we cried  
Everything was perfect  
Your kisses [?]  
We unwrapped all the presents  
Then you unwrapped me

Just got me praying for some  
To start falling

Baby, baby, do you remember  
That crazy Christmas with the crazy weather  
And spend a weekend and closer and closer  
I wanna do it one time over

Baby all we need is snow from somewhere  
To lock the door so we can go nowhere  
Getting back to you and me together  
Now every year I'm wishing for the white December

With you  
Just you  
With you
