

Resurrection

L.A. Guns

Face in the crowd keep moving in the right direction
Winners and fools self injection change all the rules
Without detection, burns right through my skin
Can't help the shape I'm in

Never gonna cry about the things that I've been missing
Too busy thinking about the girls I should be kissing
If you don't switch it on how can anybody listen

Sounded like a symphony
Did anybody stop to ask for directions
Change all the rules without detection
Reload, fire at will
Will close in for the kill
