Resurrection

L.A. Guns

Face in the crowd keep moving in the right direction Winners and fools self injection change all the rules Without detection, burns right through my skin Can't help the shape I'm in

Never gonna cry about the things that I've been missing Too busy thinking about the girls I should be kissing If you don't switch it on how can anybody listen

Sounded like a symphony Did anybody stop to ask for directions Change all the rules without detection Reload, fire at will Will close in for the kill
