

## Die & Rise

Lacuna Coil

Werewolf in the night light, you won't believe your eyes  
Blond hair in the red light, she's getting down, getting down  
She'll never turn me down, put another stake into my heart  
There's evil in her eyes  
I cheated death and I come back alive

Die and rise, and take a bite of life  
Die and rise, with no regrets  
Die, die.

Black queen in the mirror, she's pulling me aside  
One those of the white light, I'm shutting out, shutting out  
I want to wake you up in the middle of a perfect dream  
Adrenaline inside  
I cheated death and I come back alive

Die and rise, and take a bite of life  
Die and rise, with no regrets  
Die, die.

Risorgerò in ogni momento poiche  
So le che la vita si tramutera

Die and rise, and take a bite of life  
Die and rise, with no regrets  
Die, die.
