

Scabies

Lafee

Friends forever you and I
We trust each other with our lives
All the way through thick and thin from day one until the end
You're like a sister to me
We fit each other to a tee
And every time when things got rough I was there to pick you up
And then you went ahead and took my man
I can't believe you did
I just can't understand
You even have the nerve to ask hey, girl, whassup?
You know what: I'm gonna fuck you up!

I wish you would have scabies
I wish you had a nail right through your head
The way you tried to play me you deserve no other way
I wish you would have scabies
I wish your dirty ass would rot in hell
The way you tried to play me I am gonna make you pay
I wish you would have scabies

You were my one and only man but you had to go inside her pants
Why can't you just go away
I hate you guts, I hate your face
Funny, I still hear you say I'm yours forever and a day
Oh yeah? The how come I just saw you stick your tongue right down her throat?
You had to go ahead and bone my best friend
I can't believe you did
I just can't understand
you even have the nerve to ask hey, girl, whassup?
You know what: I'm gonna fuck you up!

I wish you would have scabies
I wish you had a nail right through your head
The way you tried to play me you deserve no other way
I wish you would have scabies
I wish your dirty ass would rot in hell
The way you tried to play me I am gonna make you pay
I wish you would have scabies

I wish you would have scabies
I wish you had a nail right through your head
The way you tried to play me you deserve no other way
I wish you would have scabies
I wish your dirty ass would rot in hell
The way you tried to play me I am gonna make you pay
I wish you would have scabies

I wish your dirty ass would rot in hell
The way you tried to play me I am gonna make you pay
