

Foiled Again

Lagwagon

Realizing it's too late
Destiny turns to fate
Realizing it's too late now

Now you say it's over
and the monkey's off your back
All it took was valium
and a couple of six packs
So once again you've lied
and your story remains the same
Because misery loves company
and you're the one to blame
It's Your life
and it's always the same
It's your life
and it's always the same to me
