## We Are Millions and Millions Are One

Love takes me over Like a rising rocket Love takes me over Like a shining diamond Love takes me over With golden badges on the chest What I am you'll become I saw the light We're all so much alike Come to me, do not fight I lost control Over the big blue sky So what do you want? You shine so bright But it's dark in the heat of the night So why do you want To share your star In the dark We're rising higher Come, don't look back now Let's reach the stars Before the sunrise Love takes us over Across the point of no return We are millions

And millions are like one

Embrace the new day Reflecting in your eyes
