## **All Fall Down**

It's a long lonely road Where do I go Looking for someplace that feels like home Been searchin' so long Where did I go wrong Maybe the answer's somewhere beyond

The stars in the sky And who knows why

We all fall down Life's taking it's toll It's all out of control Yeah we all fall down It's my dignity that's saving me tonight

As I walk through this maze Is this just a phase Will all my tomorrows be this way The night is so black In front and in back Sometimes it's so dark and you don't know where you're at

Like a star way up high Droppin' out of the sky

Lift me up So I can see Outside of me And what could be A different life Lalaine
