

In My Feelings

Lana Del Rey

I'm smoking while I'm runnin' on my treadmill
But I'm coming up roses
Could it be that I fell for another loser
I'm crying while I'm cumin'
Making love while I'm making good money
Sobbin' in my cup of coffee
'Cause I fell for another loser

Get that cigarette smoke out of my face
You've been wasting my time while you're taking what's mine
With the things that you're doing
Talk that talk, well now they all know your name
And there's no coming back from the place that you gain
Baby, don't do it

'Cause you got me in my feelings (catch you, it's so much right now)
Talking in my sleep again (you can do it for a while)
Drop 'em all out screaming (catch you, it's so much right now)
Who's tougher than this bitch
Who's freer than me
You wanna make the switch
Be my guest, baby
I'm feeling all my fucking feelings

I'm smoking while I'm runnin'
This town and you better believe it, honey
I'm laughing as I'm taking my prisoners
And taking down names
I'm crying while I'm gunning
In the smoke they can hear me coming
If you were me, and I was you
I'd get out of my way

Get that cigarette smoke out of my face
You've been wasting my time while you're taking what's mine
While you know what you're doing
Talk that talk, well now they all know your name
And there's no coming back from the place that you gain
Baby don't do it

'Cause you got me in my feelings (catch you, it's so much right now)
Talking in my sleep again (you can do it for a while)
Drop 'em all out screaming (catch you, it's so much right now)
Who's tougher than this bitch
Who's freer than me
You wanna make the switch
Be my guest, baby
I'm feeling all my fucking feelings

Got me up in this place right now
Making me [?]
Got me up in this place right now
I can feel love
Got me feeling so blue
Making me so [?]
Got me leave right now

'Cause you got me in my feelings (catch you, it's so much right now)
Talking in my sleep again (you can do it for a while)
Drop 'em all out screaming (catch you, it's so much right now)
Who's tougher than this bitch
Who's freer than me
You wanna make the switch
Be my guest, baby
I'm feeling all my fucking feelings
