Our Time Now

Like flowers that bloom in the spring Like church bells just waiting to ring The chance of a lifetime at last Don't let it pass

Our Time Now Just like the moon comes through the clouds And just like the sun, stars come undone It's our time now

Like valleys with mountains to climb Like clocks that are waiting to chime The chance of a lifetime will pass Let's make it last

Our Time Now Just like the moon comes through the clouds And just like the sun, stars come undone It's our time now

Like laughter from children at play Like whispers with something to say The chance of a lifetime at last Don't let it pass, no

Our Time Now Just like the moon comes through the clouds And just like the sun, stars come undone It's our time now Our Time Now Just like the moon comes through the clouds And just like the sun, stars come undone It's our time now
