

## Date With Time

Lapko

Would you heal me now  
Like a light on the road  
from the sky to the ground  
It has something to tell  
But nothing to say  
while it cares for your wounds

I have a date with time  
She's never too late

Would you heal me now  
And be one of my stars  
Like a light on the road  
You have something to tell  
But nothing to say  
please, care for my wounds

I have date with time  
He's never too late  
I have date with time  
and it's a bit more than death
