

Date With Time

Lapko

Would you heal me now
Like a light on the road
from the sky to the ground
It has something to tell
But nothing to say
while it cares for your wounds

I have a date with time
She's never too late

Would you heal me now
And be one of my stars
Like a light on the road
You have something to tell
But nothing to say
please, care for my wounds

I have date with time
He's never too late
I have date with time
and it's a bit more than death
