

# Kill Fuck Die

Lapko

I want to have it one more time  
No matter when no matter what's the price  
I want just tie myself in harmony  
No one CAN see, no one can feel

I feel somekind of solitude  
My friends are gone until I turn it on  
I wish I could be your god  
I wish I could kill, fuck, die  
and then be free

Like little girl in barren field  
Alone in darkness in the distance  
That girl in barren field  
Seeking the stars, she needs a brighter sky

Now I'm standing on the edge of that kingdom  
Those times aren't gone, but they're over for now  
Memories, my guests, accept themselves  
'Cos our religion's like a blue velvet

From the first letter 'til the last word  
Until the last world, there will be passwords

I want to kill  
I want to fuck  
I want to die  
And then be free

Like the little girl in barren field  
Alone in darkness and the distance  
That girl in barren field  
Seeking the stars she needs a brighter sky  
Alone in darkness in the distance  
That girl in barren field  
Little girl in barren field

This is the melody  
From my childhood it's everything  
It means waiting and frustaration  
And my inner joy and depression
