

Aurora

Lapush

On your side, yeah it's real big
Holding on to everything you give
Say my name when you want to it's just fine
Keep me here forever in this flight

On your side teach me the real thing
No time to think of the old scene
Say my name when you want to it's just fine
I'm still here forever in your arms

Write your name in the stars
I am trying to heal your heart

On your side let's talk about everything
Got no time for words that you've already heard
Say my name when you want to you just leave when you want to
We're still here we're still alive

Write your name in the stars
I am trying to heal your heart

Write your name...
(when all you need is someone who is listening)

You've got soul you already know...
