

Review My Kisses

Lara Fabian

I'm only happy when I'm with you
I only feel good when I'm talking to you
And I'm a mess when you don't call me
Call me at night
Where did you go?
Where did you go?
And did you think of me?

It's hard to breath when my heart is sinking
I'm slipping fast as I'm reaching for you
It's gonna hurt 'cause I have been there before
Can't take much more
Can't take another night
Without you here beside me

I want to review my kisses
On every inch of your body
I want to reveal my secrets
That only you should know
I feel all this pain inside me
That only your lips can make better
I wanna review my kisses
So you won't forget that you are mine

Don't wanna care more than you do
Don't wanna be the one who's out in the rain
Don't wanna get that call where you sound so cold
So far away, So far away
Like the distant roll of thunder

I want to review my kisses
On every inch of your body
I want to reveal my secrets
That only you should know
I feel all this pain inside me
That only your lips can make better
I wanna review my kisses
So you won't forget that you are mine

It's a cave in the darkness
And I'm lost inside you
Don't go...

I want to review my kisses
On every inch of your body
I want to reveal my secrets
That only you should know
I feel all this pain inside me
That only your lips can make better
I wanna review my kisses
So you won't forget that you are mine
So you won't forget that you are mine
