

# We are the Storm

Lara Fabian

Looks like the sky is breaking open  
Looks like the sky is falling down  
Feels like fear is taking over  
Is this the slipping of the crown

If we run for cover  
Stick our heads in the ground  
What is that to say for honour  
How will that save us now

Seems like everywhere we hear the warning  
They all say a storm is coming  
We are the storm, we are the storm  
We can be the change that brings  
The lightning down  
Be the thunder  
We are the storm, we are the storm

If we gather all our raindrops  
If we form into a wave  
And take control of angry oceans  
There is so much we could save

Be our own salvation  
Be our own higher ground  
If we recognize the power  
That is what will save us now

Seems like everywhere we hear the warning  
They all say a storm is coming  
We are the storm, we are the storm  
We can be the change that brings  
The lightning down  
Be the thunder  
We are the storm, we are the storm

Whenever the devil whispers  
Whenever the devil whispers  
Laugh in his face, laugh in his face

Whenever the devil whispers  
Whenever the devil whispers  
Laugh in his face, laugh in his face

We can be the change that brings  
The lightning down  
Be the thunder  
We are the storm, we are the storm
