When It Rains

(Lari White) He'd had some time He'd been doing fine He couldn't remember when she'd last crossed his mind But a storm cloud comes stealin' With that old mournful feelin' Just like the black night she left him behind When it rains When it rains It pours down memories and thunders her name And he drowns in the flood of the same old pain When it rains When it rains He starts to cry He gets to wondering why And he's sure he can't take one more long lonely night But his mind keeps on achin' And his heart keeps on breakin' And he stands shakin' his fist at the sky When it rains When it rains It pours down memories and thunders her name And he drowns in the flood of the same old pain When it rains When it rains When it rains It pours down memories and thunders her name And he drowns in the flood of the same old pain When it rains When it rains
