

Honolulu

Last Dinosaurs

We met in a place where love is won
We've fallen together and now we're one
The future the future yeah it stays true
The future the future yeah it stays true

Ohhh
I'll teach you what you need to know
Till the day that I finally go
My love will forever grow

Oh darling if you could read my mind
Heaven knows what you would find
These people these people they're turning back
These people these people they're turning back

Ohhh
I'll teach you what you need to know
Till the day that I finally go
My love will forever grow

The story only just, it just began
And surely it should never ever end

The story only just, it just began
And surely it should never ever end

The story only just, it just began
And surely it should never ever end

The story only just, it just began
And surely it should never ever end

And surely it should never ever end
