

# Parachute

Laura Marano

I remember life before  
Faraway dreams and locking doors  
Then you came, then you came  
Afraid to fall, to be free  
Always were our worst enemy  
Isn't what, what you see  
I took time to realize  
That I couldn't do it by myself, myself

There's no gravity when you're next to me  
You always break my fall like a parachute  
When you're holding me so well it's like I barely breathe  
You always break my fall, my fall  
Like a parachute  
You're my parachute

With you it all begins  
Feeling okay in my own skin  
So alive, I'm so alive  
I know this life isn't gonna be perfect  
The ups and downs are gonna be worth it  
As long as I'm, I'm with you

There's no gravity when you're next to me  
You always break my fall like a parachute  
When you're holding me so well it's like I barely breathe  
You always break my fall, my fall  
You're my parachute

When I'm standing at the edge  
It's such a long way down  
And I second-guess myself  
You better catch me now  
Woah, woah  
Woah, woah  
Never touch the ground

There's no gravity when you're next to me  
You always break my fall like a parachute  
When you're holding me so well it's like I barely breathe  
You always break my fall, my fall  
Like a parachute  
You're my parachute
