

Love You Like Me

Laura Marie

I can love you like a song, give you words to sing along,
all the words you want to hear
I can love you every day so I never miss your face
should the daylight disappear
then, I can love you in a dream keep you coming back to me
if you have to leave me here
I can love you like me.
I can love you like me but in this song.

I can love you like a storm then settle down and keep you warm,
be the place you want to go
I can love you like a wave, come in crashing on your day and,
should you find your nights alone,
then, let me love you like my heart's wrapped around you in the
dark,
be you mine to have and hold
I can love you like me.
I can love you like me but in this song.

Others can take all of these words and make
the same mistakes we've made that I won't erase.
There's not a single moment that I'd ever trade.

I want to love you like it's wrong, wrap the words around my tongue,
let the meaning fall below.
Just, let me love you until it's right, leave the questions all
behind because, believe me, now I know.

I can love you like me
I can love you like me in this song
